

GroPep Bioreagents

Pre-immune normal rabbit IgG

Description

This immunoglobulin G (IgG) fraction was purified from normal rabbit serum obtained from animals with no history of immunisation. It can be used as a negative control for GroPep Bioreagents' range of purified rabbit IgG antibodies.

Source: Affinity purified from normal rabbit serum

Appearance: Lyophilized powder

Storage/Stability: At least 2 years at 2 - 4°C (lyophilized).
After reconstitution store at -20°C or -80°C
Avoid freeze-thaw cycles

Reconstitution: Dissolve the vial contents in 1 ml sterile water and then dilute in a buffer suitable for the application.
