## Rabbit IgG antiserum (Goat)

### Description

This anti-rabbit immunoglobulin G (IgG) antiserum is harvested from goats which were immunised with affinity purified rabbit IgG. The product can be used as a secondary antibody in a number of immunoassay protocols which employ a rabbit IgG as the primary antibody.

<b>Immunogen:</b>	Affinity purified rabbit IgG
<b>Source:</b>	Goat antiserum
<b>Appearance:</b>	Lyophilized powder
<b>Storage/Stability:</b>	At least 2 years at 2 - 4°C (lyophilized). After reconstitution store at -20°C or -80°C Avoid freeze-thaw cycles
<b>Reconstitution:</b>	Dissolve in a buffer suitable for the application.
